

CIVIL ENGINEER-IN-TRAINING (FULL TIME, PERMANENT)

Vancouver, BC

Website: waterstreeteng.com

Apply by email to: inquiries@waterstreeteng.com

ABOUT THE OPPORTUNITY

Water Street Engineering Ltd. is seeking a full-time civil engineer-in-training to join our Vancouver office. In this position, you will have the opportunity to work as part of a team of engineers and technologists on projects for a range of public and private sector clients. This is a great opportunity for a motivated, energetic individual who wants to challenge their abilities in a dynamic work environment and who is looking for the opportunity to grow within a local employee-owned company.

ABOUT US

Water Street Engineering Ltd. is an employee-owned engineering consultancy specializing in water infrastructure planning and design. Our mission is to create safe, cost-effective, and practical solutions to water engineering challenges that contribute to the success and goals of our clients.

YOUR ROLE

You will carry out design, analysis, and construction management on civil/water resources projects, typically including:

- Design of water booster pump station upgrades, PRV stations, and sanitary sewer lift stations
- Design of water mains, storm sewers, and sanitary sewer upgrades
- Hydraulic analysis of water and sewer systems
- Water distribution system design
- Stormwater analysis, modelling, and design
- Field reviews and other construction services

You will be a critical part of our exciting and growing team.

REQUIREMENTS

You are passionate about engineering design and analysis. You have the ability to work in a team and have a track record of successfully completing projects. You are a recognized technical specialist with a well-rounded skill set.

You want to be part of a team that values technical excellence, personal commitment and responsibility, co-operation, trust, and quality. You are an entrepreneur at heart and have an interest in having significant levels of ownership and influence in a local consulting engineering company.

Minimum Qualifications:

- A degree in civil or water resources engineering plus 1 to 3 years of relevant industry experience

- Registered as an Engineer-in-Training with Engineers and Geoscientists BC (or eligible to be)
- Experience working as a design engineer in a consulting engineering firm
- Experience preparing detailed design packages (i.e., drawings and technical specifications)
- Construction inspection and management experience
- Strong project management skills
- Fluent in English and eligible to work in Canada
- Valid driver's license and access to a vehicle (personal or car share)

WHAT WE OFFER

Water Street specializes in water, wastewater, and water resources infrastructure planning and design. Check out our philosophy, team, projects, and areas of expertise on our website. Ask around the industry.

- You will have extensive opportunities for career growth, advancement, and development.
- We offer high levels of responsibility and autonomy, and you will have flexibility to pursue your own technical and business interests.
- You will have opportunity for ownership in the company, allowing you to benefit from both dividends and share price growth.
- We offer a competitive salary, health benefits package, and performance-based bonus structure.
- We offer a flexible work style, location, and hours.

The position is based out of our Gastown office, which is a great space overlooking the harbour and the north shore. The office has in-suite laundry and kitchen, while the building has a bike locker, gym, and other amenities. Our employees have considerable freedom to choose their work hours, and to work some of the time remotely.

HOW TO APPLY

To apply, send your resume and cover letter to inquiries@waterstreeteng.com
